- 1.3 There were 18 missed approaches during this reporting period, 17 on runway 24 and 1 on runway 06.

**2. Noise monitoring**

- 2.1 The fixed Noise Monitoring Terminals continue to operate from their locations on the approaches to runway 06 and 24.
- 2.2 The INM Annual Noise Assessment Report 2019 was submitted in January 2020 and included actual contours for January to December 2019 and predicted contours for January to December 2020. Results from the assessment demonstrated that the calculated contours remain well within the boundaries set by the Planning Agreement.
- 2.3 The next INM Noise Assessment will take place in July and will produce actual contours for Jan to Jun 2020 and predicted contours for Jul to Dec 2020.

### 3. Air Quality Monitoring

- 3.1 Air quality monitoring continues at 13 locations in Rushmoor and Hart. All results from the monitoring stations indicate that NO<sub>2</sub> levels at the 13 locations are below the limits specified in the Air Quality Regulations and show no indication of significant influence by airport operations.
  - 3.2 The active NO<sub>2</sub> monitoring devices (Learian Streetboxes) operate at their agreed locations (Kempton Court and Farnborough College). Results from the units show NO<sub>2</sub> levels lie within the regulated levels.
  - 3.3 During this reporting period, zero complaints related to odour were received.
- 

### 4. Runway Use

- 4.1 The predominant south-west winds in the Farnborough area favoured use of runway 24 during the reporting period, most significantly in February 2020. Table 4.2 details recorded runway use and operation (i.e. Departure or Arrival) figures for the reporting period.
