

TAG Farnborough Airport

Farnborough Aerodrome Consultative Committee
TAG Information Report
July 2008

1. Aircraft Movements

1.1 TAG's planning permission allows for 28,000 movements a year, of which up to 1,500 may be between 50-80 tonnes maximum take-off weight (MTOW).

1.2 Movements since the last meeting are as follows:-

| Month | Aircraft Movements | 50-80T movements | Weekend movements |
|---------------------|--------------------|------------------|-------------------|
| February | 1955 | 21 | 213 |
| March | 2009 | 15 | 313 |
| April | 2144 | 47 | 283 |
| May | 2560 | 26 | 465 |
| Period Total | 8668 | 109 | 1274 |
| 2008 Total | 10644 | 136 | 1488 |

2. Noise monitoring

2.1 The fixed Noise Monitoring Terminals continue to operate from their locations on the Runway 06 and 24 approaches. The portable noise monitor is currently in use for the purpose of noise monitoring in conjunction with the most recent phase of the Quiet Flying Program Noise Abatement Procedure Trial. Having been positioned in a number of locations for five day periods, prior to the commencement of the latest trial (which commenced on the 8th May 2008), the PNM is now scheduled to be located underneath the trail "noise route south". In this location the data logged will be used to determine the noise effect of the new departure procedure from runway 24.

2.2 Noise Modelling of actual movements in 2007 and predicted movements for the calendar year 2008 was completed in February and subsequently submitted to Rushmoor Borough Council in the Annual INM Noise Assessment Report 2007. The intermediate modelling exercise in which actual noise contours for quarters one and two 2008 and predicted noise contours for quarters three and four 2008 will be completed and submitted to Rushmoor Borough Council in August 2008 (by the end of week 2).

Copies of the report will also be supplied to Hart and Surrey Heath councils in accordance with the requirements of the Town and Country Planning Act Section 106 Agreement between TAG (as airport operator) and Rushmoor Borough Council (as planning authority).

The software program that will be employed as a part of the TAG Noise Assessment Reporting process will be INM 6.2. Whilst INM 7.0 has been purchased as per the requirements of the Town and Country Planning Act Section 106 Agreement, this cannot be used to the incompatibility issues with the INM Link Program that enables the use of real track data in modelling exercises. This issue has been continually raised with Brüel & Kjær and on the 18th June a letter was submitted to B & K requesting an official response to adequately address this matter. In addition we have recently been informed that B & K will be arranging for their Customised Solution Manager to visit TAG Farnborough Airport to discuss this issue with us in person.

3. Air Quality Monitoring

- 3.1 Air quality monitoring continues at 13 locations in Rushmoor and Hart. All results from the monitoring devices continue to indicate that NO_x levels in these areas are below the limits specified in the Air Quality Regulations. NO_x monitoring results continue to show no indication of being significantly influenced by airport operations.
- 3.2 The active NO_x monitoring devices (Learian Streetboxes) continue to operate at the agreed locations. Active monitoring will continue throughout 2008.

4. Runway Use

- 4.1 The predominant south westerly winds in the Farnborough area continued to favour use of runway 24, for the most part, from February to April. During May the high pressure weather systems resulted in the significant change to prevailing winds and as a result, runway 06 has almost exclusively been the runway in use.

All recorded runway use and operation (i.e. Departure or Arrival) figures for the months of February, March, April and May are detailed below.

A number of helicopters are subject to different procedures to fixed wing aircraft and do not require the use of the runway and ILS navigational aids, they are therefore classified as a separate percentage. Percentages of helicopter movements that have made use of the runway are also detailed.

4.2 Percentage Runway use

| Month | Farnborough | | Fleet | | R/W Heli movements | ADM Heli movements |
|--------|-------------|--------|--------|--------|--------------------|--------------------|
| | 24 Arr | 06 Dep | 06 Arr | 24 Dep | | |
| Feb 08 | 35 | 12 | 13 | 36 | 2 | 2 |
| Mar 08 | 40 | 7 | 8 | 41 | 2 | 2 |
| Apr 08 | 36 | 11 | 12 | 36 | 3 | 2 |
| May 08 | 11 | 35 | 36 | 13 | 2 | 3 |

5. New Development

- 5.1 The hearing of evidence regarding TAG's appeal against Rushmoor's decision with respect to redistribution of weekend movements took place over the 2nd, 3rd, 4th and 5th of April 2007. The verdict was reached in March 2008 allowing operation of 4200 flights at TAG Farnborough Airport on weekends and Bank holidays in 2008, rising to a maximum permission of 5000 movements on weekends and Bank holidays from 2009 onwards.

6. Initiatives

7. Complaints

- 7.1 The standard procedure of aircraft track monitoring continues with all movements audited in terms of aircraft track and altitude profile. The recording and investigation of all complaints received at the airport continues using the dedicated complaint line (01252 526001) which is now accessible through the main TAG switchboard number.
- 7.2 All aircraft and associated operators that fail to follow mandatory procedures without prior authorisation from Air Traffic Control are subject to further investigation. The standard procedure of contacting aircraft operators and requesting acknowledgement and details of action implemented to mitigate breaches of procedure continues.

On occasion, aircraft are permitted to deviate from mandatory procedures by ATC. This cancellation of noise abatement procedures is only ever initiated when the maintenance of safety margins demands. The number of noise abatement cancellations issued is being recorded and monitored using data provided by ATC.

7.3 Attached is a summary table for the period since the last meeting along with a more detailed report of complaints received and the details associated.
